

PHOTO MONTAGES & SLIDE SHOW VIDEOS

Access Video can turn your pictures into a memorable video presentation for events such as weddings, anniversaries, birthday parties, and more. Our productions are not just slide-flipping set to music. We create a powerful presentation unique to your event, with custom opening and closing graphics, zooming and panning of images as appropriate, and image timing to maximize impact. Short video clips can also be included if desired.

Timing may vary, but a typical presentation uses about 10 pictures per minute, and most run between 10 and 20 minutes or about 100-200 pictures.

Our basic package includes:

- Opening Graphic (text)
- Section Titles (if desired) every 20-40 pictures
- "Stock" Background Music (one per section)
- Panning/Zooming when appropriate (usually about ¼ of pictures)
- Closing Graphic (text)
- Customized disc and case labeling of "keepsake" quality

Still have questions? Check out our [FAQs page](#).

*** IMPORTANT NOTE:** If pictures are provided on digital media, the order of the pictures will be determined by the alphabetical ordering of the picture file names in ascending order. Please be aware that alphabetically 11 comes before 2. So if you have over 100 photos, they should be numbered 001, 002, etc. Otherwise the computer will sort them as 1, 11, 12, 13, 14, 15, 16, 17, 18, 19, 2, 21, 22, etc.

Pricing Example: You want to create a 10-minute presentation, per Access Video's basic package, from 100 photo prints, to be played in a DVD player, and you want four additional copies to hand out to friends and relatives on DVD. Pricing would be:

Photo Captures, 100 @ \$1.25 = \$125.00
Video Editing, 3 Hours @ \$60.00 = \$180.00
DVD authoring/output, 1 @ \$20.00 = \$20.00
Additional DVD copies, 4 @ \$7.50 = \$30.00

Total Price = \$355.00 plus any applicable tax.

In this example, the price would be \$50.00 less if the source photos were provided on digital media rather than prints.
